

SHED SOME LIGHT ON THE #1 WORKPLACE KILLER

Slips and falls are the single largest hazard in the workplace, accounting for more deaths than most other accidents combined.

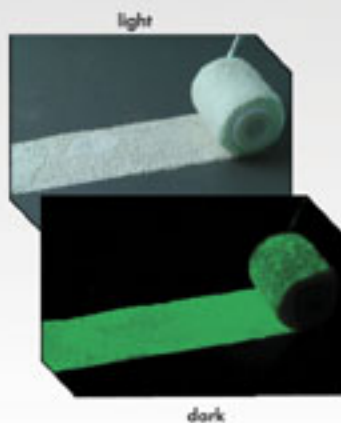

When the lights dim or the power goes out, the possibility of serious injury from a slip or fall skyrockets, costing companies millions of dollars a year in lost productivity, high insurance premiums, and worker's compensation claims.

Roll-on the light!

GlowGRIP provides the ultimate protection - illumination and slip-resistance - in one simple coating.

GlowGRIP is a durable, glow-in-the-dark slip-resistant coating that will provide a luminous surface for up to 12 hours after a 15-minute exposure to light. It can be used indoors and outdoors to illuminate stairs, pathways, or obstacles - allowing building occupants to find their way to safety.

GlowGRIP exceeds OSHA and ADA non-slip standards and is easily applied using a brush or roller.

For more information about non-skid or luminous coatings, visit www.KANKOTE.com or call 1-814-849-0505
